

Hiring:

# Front-end Web Developer

## JOB DESCRIPTION

## 1

## SUMMARY

We are seeking a skilled web developer for the creation of a live dashboard for our innovative real-time data scraping and sentiment analysis tool, specifically tailored to political consultancies. This dashboard will serve as the primary interface for our clients, providing dynamic updates and comprehensive analytics to help political strategists understand and react to public sentiment efficiently.

## 2

## RESPONSIBILITIES

- Develop and deploy a live dashboard that visually represents real-time data and analytics in an intuitive format.
- Integrate the dashboard with backend systems to fetch, display, and update data seamlessly without page reloads.
- Implement interactive features that allow users to customize views, filter data, and manipulate variables to explore different analytical scenarios.
- Ensure the dashboard is responsive, accessible, and performs reliably across all platforms and devices.
- Work closely with our UI/UX designer to translate visual and interaction designs into a functional web interface.
- Optimize the dashboard for performance, particularly focusing on speed and real-time responsiveness.
- Regularly update and maintain the dashboard to incorporate new features, improve functionality, and address any issues.

### 3

## SKILLS REQUIRED

- Proficiency in front-end technologies such as HTML5, CSS3, and JavaScript.
- Experience with modern JavaScript frameworks like React, Angular, or Vue.js, with a strong preference for expertise in the framework currently in use by our team (e.g., React).
- Knowledge of web sockets or other technologies suitable for real-time web communications.
- Familiarity with server-side programming and the ability to integrate seamlessly with various back-end systems.
- Understanding of best practices for web performance, security, and scalability.
- Excellent problem-solving skills and the ability to work collaboratively in a dynamic environment.

### 4

## PROJECT DURATION & FLEXIBILITY

This project is scheduled for a 2-month intensive development phase, focusing on setting up and launching the live dashboard. Post-launch, there will be a period of lighter oversight to manage updates and address any immediate issues. We offer flexible working hours, making this an ideal opportunity for freelancers, current employees seeking side projects, or college students. The priority is on project completion and quality delivery, regardless of your current employment status or time commitments. As long as the project goals are met within the timeline, we are open to accommodating various working styles.
